onto Wacker Rd. Go across RR tracks to 1st place on right. (815-273-2344)

Notes for All Illinois Shippers

Please read carefully!

We are entering into a new season at a time when the markets for the pelts we produce here in Illinois **are somewhat depressed. Remember, properly handled pelts bring the best prices. Now is the time to hone your skills.**

Elsewhere in this packet there is more specific information on current market expectations. Also there is information that may answer questions you might have. To obtain that information you need to read through all the documents included.

One of those documents is our scheduled fur route pickups. After you've read it, please post it where you and others can refer to it. You should know that we will be in a Budget Truck (white) and that our scheduled pickup times are based on good weather and driving conditions. While we do put an extra 15 minutes into our travel time in case of bad weather it may not be enough in some cases. Please be early at the stops, we should be too but please understand we must leave on time. If we are 30 minutes over due you should call us on our cell phone number on board is 815-238-7406 (for fur routes only).

Another of these documents are some shipping tags and some invoices that are pre-printed with all the necessary info. All you need to do is put the number of pelts in each bag onto the tag that you affix to that bag. Then on **one** invoice fill in the total number of all pelts you are shipping at that time. We will have extra bags, tags, and invoices along should you need them. Since we are pinched for time it is better if you have all of this done when we get there. We don't need to count your pelts, that's done at Stoughton. You can use plastic wire ties or whatever works for you to close the bags and affix the tags you filled out.

There is a place on the tag and invoice for your license number. You should fill in the number but we need to see the licenses when we pick up your fur.

If you are sending your fur with someone else to our pickup stop you must also send your license or a photocopy of it or we can't receive it. This goes for buyer's licenses also. The DNR demands that we see the license to verify it is current.

As you know there are two zones in Illinois with different opening and closing season's dates for the different species as well as different dates for hunting and trapping of several species. If you are using hunting dates for some and trapping for others you should include both numbers and have both licenses with you.

Several years ago your state trapper and hunter organizations pushed for and got an additional 10 days at the end of the season for you to get your fur ready to sell. Which means you now have 20 days after the close of the trapping or hunting season in the zone you are in to market your fur. We try to set our routes to coincide with those dates.

Due to a very painful henia surgery we are forced to discontinue the contest for most pelts in one bag! Seriously, because we usually need to fill the truck to the top to fit it all on board, we need to limit the number of *coon pelts in each bag to 75* or so. It's much easier to get a bag of that size up on the top than it is on one with 125-150 pelts. We have plenty of bags, if you need more just contact the Stoughton office and they'll send them to you.

Please understand that we cannot accept pelts that are beyond the legal date—no exceptions!! You should know that if you need more time to get your pelts ready you can get a buyers license for as little as \$25.00 which allows you to have the fur in your possession until approximately one month after beaver season closes. There are record-keeping requirements though. For more information or to obtain a permit contact Bob Bluet @217-782-7580.

There seems to be some confusion over what the term “green fur” means. While some feel it is somewhat vague here in Illinois (while different in other states) **the term “green fur” means any pelt that has not been tanned.** Which includes pelts on the carcass, skinned pelts, and fleshed and dried pelts. ***So unless it has been tanned you have to have it out of your possession within 20 days after the close of season unless you have a buyer's license.***

Information about the NAFA shipper's council is included in this packet and you should consider joining in on this great benefit. Along with ownership of the company you get a 2% reduction in the commission charged to market your pelts for you as well as other benefits. Check it out!!!
